

AVCAM Camera System - Aquaculture

PRODUCT DESCRIPTION

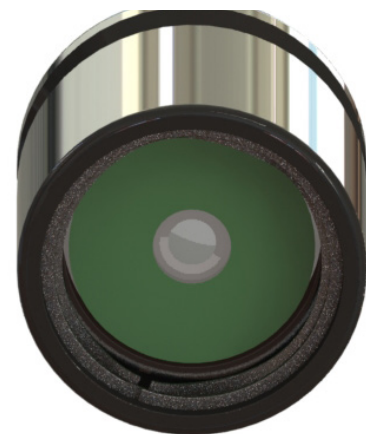

Feed management is integral to all aquaculture operations. AgriMarine Technologies Inc. designed the AVCAM stationary underwater feeding camera with flexibility and efficiency in mind. Our stationary cameras provide live feed monitoring with high visibility under low light conditions, so that farmers can easily detect uneaten feed.

DESIGN FEATURES

- AVCAM Camera offers high resolution under low light conditions
- Auto-switch from colour to black & white under low light
- Affordable, robust receptacle
- Permanent installation for hatcheries, rearing tanks and cages
- Live feed monitoring - our AVCAM Camera connects to the AVCAM Camera Cart* monitor (sold separately)
- Sharp video imaging

CAMERA SPECIFICATIONS

Maximum Recommended Depth	30 Metres
Operating Mode	Autoswitch colour to B/W in low light
Power	12 V /70 mA
Resolution	700 TVL
Light Sensitivity	0.0001 Lux (B/W)
Lens Focal Length	3.6 mm
Angle of View	92° in air / 72° under water
Materials	Acetal / Polycarbonate / Stainless Steel
Cable Rating	IP69K
Overall Dimensions	63 x 80 mm
Weight(s)	With Cordset: 1400g Without Cordset: 220g
